

# AC Inverter

The AC inverter enables the use of household appliances inside the vehicle.\*

This inverter converts the DC voltage of the battery into household AC voltage, enabling the use of household appliances inside the vehicle. Electrical outlets can be installed inside the cabin, allowing the vehicle occupants to enjoy a wide range of business and leisure activities.

\*Depending on the specification of electrical appliances, they may not operate normally.

## 1500W AC Inverter

Enables a maximum output of 1500W by drawing on the hybrid vehicle's large-capacity battery. Even household appliances with relatively large power consumption, such as microwave ovens, can be used inside the cabin, enabling the vehicle to be used as an emergency power supply in a time of disaster.

### Specifications

Output voltage : 100V*	Output power : 1500W
Installed in : Toyota Prius Toyota Prius α Toyota PriusPHV Toyota SAI Hybrid Toyota Estima Hybrid Toyota Alphard Hybrid Toyota Vellfire Hybrid LEXUS CT 200h	

\*220V (under development)

### Product line-up suitable for every region and application

Our AC inverters offer a wide range of output from 100W to 1500W. They have been installed in a wide variety of vehicle models and are much utilized by people all over the world.

Output Voltage	Japan 100V	North America 120V	Europe/China and Other Regions 220V
Output Power			
1500W			
400W			
100W~150W
